

## ***Maximum performance. Maximum experience***

With the YFM700R SE, a day on the trail with friends becomes a thrilling experience – thanks to this ATV's punchy, sporty character.

Whether you're climbing rocky gradients, tackling a muddy bog, or enjoying the freedom of an open trail, you'll get active sporty handling and performance that will leave you with smiles on your faces.

A sports hybrid frame absorbs every knock and bump, but is light enough for slick manoeuvres. Paired with a torque-filled 686cc engine, the result is pure adrenaline from the moment you turn the key. And thanks to that trademark Yamaha reliability, you can head into the wilderness with total confidence.

- ▶ Consistent performer: 686cc fuel-injected engine
- ▶ Tremendous torque straight from idle
- ▶ Strong, lightweight hybrid aluminium/steel frame
- ▶ 5-speed transmission with reverse – easy shifting
- ▶ Fully-adjustable piggyback shocks
- ▶ Aluminium components for reduced unsprung weight
- ▶ Ready to ride at only 192kg
- ▶ Informative easy-to-read LED display
- ▶ Push-button electric-start for convenience
- ▶ Sleek, predatory design; more knee space for rider
- ▶ Ergonomic thumb throttle-lever prevents fatigue
- ▶ Standard with aluminium wheels

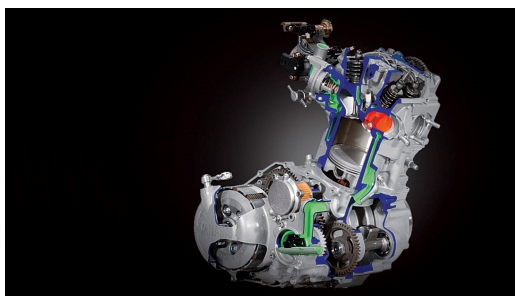

## ***Yamaha Leisure ATVs***

Exploration and a world of new experiences – that's the promise of Yamaha's leisure range. These ATVs are absolutely perfect for anyone who wants to have an off-road adventure.

Choose from ultra-easy-to-handle entry-level models, or ATVs designed for long-range comfort and ability. As you'll discover, there's an ATV to suit everyone.

Each model is built around an ultra-reliable 4-stroke engine that combines the optimum package of performance, durability and reliability. But most important of all, it will provide you with worry-free fun and fantastic memories, every time you venture into the outdoors with your friends.

### Precision engine design

Yamaha 4-stroke ATV engines are designed to provide high levels of torque at low rpm. The result is increased traction – on all kinds of terrain. To ensure maximum power and economy, the Electronic Fuel Injection system in the YFM700R SE uses an electronic controller to deliver a precisely metered mix of fuel and air into the combustion chamber.

### Hybrid chassis engineering

For the kind of strength that withstands every knock and bump, a state-of-the-art chassis combines a steel front section with an aluminium rear section and detachable subframe. A new additional gusset offers extra rigidity, and increased powder coating protects against scratches and chips.

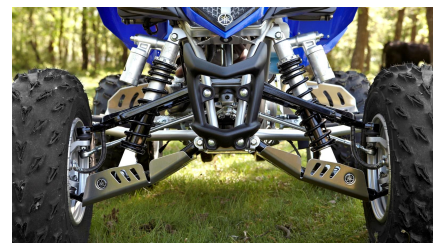

### Effortless transmission

The YFM700R SE has a 5-speed gearbox (with reverse). Gear selection lets you smoothly shift between ratios, giving you confidence when riding the YFM700R SE's powerful 686cc engine.

### Long-travel adjustable suspension

With long-travel suspension, tyres maintain longer and more consistent ground contact – even on uneven terrain. With independent front suspension, the movement of each front wheel is not affected by the other. This improves handling by allowing the ATV to track bumpy terrain more accurately and remain in a level, controlled posture.

### Finely balanced rims and callipers

Lightweight rims and brake callipers contribute to a low unsprung weight. Two-piston front brake callipers ensure great stopping power while the new two-piston rear brake callipers design, also already used on our sports YFZ450R, give more breaking power. Both providing the rider with better feedback.

### Ergonomic design

Piloting an ATV is a fun, physical activity that uses unusual combinations of muscles. Yamaha ATVs are designed to be straightforward to use, and comfortable for the widest possible range of body shapes and sizes. The front end redesign allows for extra knee clearance for improved body movement, while retaining the aggressive, streamlined YFM700R styling.

## Engine

Engine type	Single cylinder, liquid-cooled, 4-stroke, 4-valves
Displacement	686cc
Bore x stroke	102.0 mm x 84.0 mm
Compression ratio	9.2 : 1
Lubrication system	Dry sump
Fuel system	Fuel injection, 44 mm
Ignition system	ECU
Starter system	Electric
Transmission system	5 speed & reverse, wet multiplate clutch
Drive system	2WD
Final transmission	Sealed O-ring chain, eccentric adjustment

## Chassis

Front suspension system	Independent double wishbone, threaded preload adjustable spring, 3-way adjustable damper, 230 mm wheel travel
Rear suspension system	Cast aluminium swingarm, threaded preload adjustable spring, 3-way adjustable damper, 256 mm wheel travel
Front brake	Ventilated disc with hydraulic twin piston callipers on each wheel
Rear brake	Ventilated disc with hydraulic twin piston callipers
Front tyres	AT21x7-10
Rear tyres	AT20x10-9

## Dimensions

Overall length	1,845 mm
Overall width	1,170 mm
Overall height	1,130 mm
Seat height	815 mm
Wheelbase	1,280 mm
Minimum ground clearance	240 mm
Wet weight (including full oil and fuel tank)	192 kg
Fuel tank capacity	11.0 litres

ATVs with engines up to 70cc are recommended for use only by riders 6 years and older and always with adult supervision. ATVs with engines of 70 to 90cc are recommended only for use by riders 12 years and older, and always under adult supervision. ATVs with engines of 90cc or greater are recommended for use only by riders 16 years and older. ATVs are built to operate within their design limits. Safe towable weights, together with maximum carrying capacity are identified in the owner's manual if applicable. For durability, reliability, but most important of all, operator safety, under no circumstances should the recommended capacities be exceeded. Yamaha recommends that all ATV riders take an approved training course. For safety and training information, see your dealer or call your Yamaha Distributor in your country. ATVs can be hazardous to operate. For your safety: always avoid paved surfaces. ATVs are designed for unpaved surfaces only. Riding on paved surfaces may seriously affect handling and control and can cause loss of control. Always wear a helmet, eye protection and protective clothing. Never carry any passengers. Never engage in stunt riding. Riding and alcohol/drugs don't mix. Avoid excessive speed and be particularly careful on difficult terrain. Please 'tread lightly': always ride in a responsible manner, respecting the environment as well as country and local laws. The riders in this brochure are professionals: don't attempt to emulate them. The specification and appearance of Yamaha products will be varied from time to time without notice, and as shown here are illustrative only and are not a contractual description of products. Some models are shown with optional accessories. All ATVs come with a 12-month Limited Factory Warranty, except for Banshee, which carries a 90-day Limited Factory Warranty. See your dealer for details.

### The Yamaha Chain of Quality

Yamaha technicians are fully trained and equipped to offer the best service and advice for your Yamaha product. For this reason, Yamaha strongly recommends visiting an official Yamaha dealer for all your service requirements.

Yamaha Genuine Parts & Accessories are especially developed, designed and tested for our Yamaha product range. Yamaha also recommends the use of Yamalube®, our own range of high-tech lubricants – the lifeblood of Yamaha engines. They are developed to carry on working effectively, no matter where you ride.

Besides functional and style accessories, Yamaha offers a range of high quality, innovative riding gear designed to keep you comfortable and protected. An extensive range of casual wear is also available. For more information go to:
