

A tough and reliable partner.

Grizzly 700 EPS is Yamaha's biggest and toughest ATV. So whenever you need a solid and dependable workmate for tough jobs, this rugged all-terrain utility vehicle is always ready to help.

User-friendly features include a fully-automatic Ultramatic® transmission for smooth and responsive performance – this smart system also applies engine braking for controlled descents on steep slopes.

Powered by our latest-generation high-torque 686cc fuel-injected engine, this Grizzly 700 features a revised dual-mode EPS and different steering geometry for lighter handling. The A-arms give a wider track for wheel improved stability – and the model also gives even better fuel efficiency.

- ▶ High compression 686cc 4-stroke engine
- ▶ Ultramatic® transmission with downhill braking
- ▶ Dual mode Electronic Power Steering (EPS)
- ▶ On-Command® drive system with 2WD, 4WD, Diff Lock
- ▶ Wide track and independent long-travel suspension
- ▶ Four-wheel hydraulic disc brakes
- ▶ Electronic Fuel Injection for instant response
- ▶ 20-litre fuel tank capacity, good fuel economy
- ▶ Low-maintenance shaft drive
- ▶ Comprehensive LCD instrumentation
- ▶ 130kg load-carrying capacity in total
- ▶ Satin Black edition standard with aluminium wheels

Yamaha Utility ATVs

Yamaha Utility ATVs are built with one goal in mind: easing the workloads of those in tough outdoor environments.

This philosophy is engineered in every detail. Like torque-heavy engines that get you moving when terrain is tricky, or loads are heavy; effort-reducing technologies like automatic transmission and Electric Power Steering; and ergonomic designs which mean you'll still feel comfortable after a long day in the saddle. Plus, they run economically and require low maintenance.

Yamaha Utility ATVs are tireless workhorses – but that's not all they are. When time permits, these vehicles pack the punch to give riders a big dose of fun, too.

High compression 686cc 4-stroke single-cylinder engine

The Grizzly's high compression 686cc single cylinder engine is leaner, cleaner and meaner. Power and torque are increased, while a new piston, modified head design and single pipe exhaust give improved combustion efficiency for lower emissions* and up to 30% fuel savings.

*(EPA/CARB (LA-4 Mode measurements))

Electronic Fuel Injection

The 686cc engine is equipped with an Electronic Fuel Injection system to ensure that the ideal fuel/air mix is injected into the cylinder head in a wide range of operating conditions. So in summer or winter, at sea level or up a mountain, unladen or pulling a trailer, the Grizzly is ready to deliver smooth and efficient running performance.

Automatic transmission with smooth engine braking

This may be Yamaha's biggest utility ATV, but it's also one of the smoothest to operate! Its automatic Ultramatic® transmission means you just need to open the throttle and you're on the move - no clutch, no gears, no worries! And on steep downhills this clever system also applies engine braking for controlled descents.

Wide wheel track and long-travel independent suspension

Wider A-arms on this Grizzly 700 increase the wheel track resulting in better stability and improved handling control. The independent suspension allows all 4 wheels to maintain contact with the ground in uneven terrain. And the long-stroke shocks and plenty of wheel travel allows you to overcome obstacles.

On-Command® drive system

Whatever the terrain, you can be confident that the Grizzly 700 has the technology to handle it! For quick and easy transition from 2 wheel drive to 4 wheel the drive, this go-anywhere ATV is equipped with Yamaha's On-Command® drive system. Just push the button and select 2WD, 4WD or 4WD with Diff Lock. There's no stopping you now!

Dual-Mode speed-sensitive Electronic Power Steering (EPS)

The Grizzly 700 has a new dual-mode EPS system that greatly reduces the physical effort required when steering - and it also increases comfort by absorbing shocks from bumpy trails. The EPS system now has a second programme which automatically takes over during 4WD & Diff Lock mode for smoother steering.

Engine

Engine type	Single cylinder, liquid-cooled, 4-stroke, SOHC, 4-valves
Displacement	686cc
Bore x stroke	102.0 mm x 84.0 mm
Compression ratio	10.0 : 1
Lubrication system	Wet sump
Fuel system	Fuel Injection
Ignition system	TCI, ECU
Starter system	Electric
Transmission system	Ultramatic® V-belt with all wheel engine braking, H/L/N/R/P
Drive system	On-Command® 2WD/4WD/diff-lock
Final transmission	Shaft

Chassis

Front suspension system	Independent double wishbone, 5 position preload adjustment, 193 mm wheel travel
Rear suspension system	Independent double wishbone, 5 position preload adjustment, 232 mm wheel travel
Front brake	Dual hydraulic disc
Rear brake	Dual hydraulic disc
Front tyres	AT25x8-12
Rear tyres	AT25x10-12

Dimensions

Overall length	2,065 mm
Overall width	1,180 mm
Overall height	1,240 mm
Seat height	905 mm
Wheelbase	1,250 mm
Minimum ground clearance	275 mm
Min. turning radius	3.5 m
Fuel tank capacity	20.0 litres
Oil tank capacity	2.4 litres

Loading limits

Front rack	45 kg
Rear rack	85 kg

Additional features

Steering System	Ackermann-type with Dual Mode Electric Power Steering
-----------------	---

ATVs with engines up to 70cc are recommended for use only by riders 6 years and older and always with adult supervision. ATVs with engines of 70 to 90cc are recommended only for use by riders 12 years and older, and always under adult supervision. ATVs with engines of 90cc or greater are recommended for use only by riders 16 years and older. ATVs are built to operate within their design limits. Safe towable weights, together with maximum carrying capacity are identified in the owner's manual if applicable. For durability, reliability, but most important of all, operator safety, under no circumstances should the recommended capacities be exceeded. Yamaha recommends that all ATV riders take an approved training course. For safety and training information, see your dealer or call your Yamaha Distributor in your country. ATVs can be hazardous to operate. For your safety: always avoid paved surfaces. ATVs are designed for unpaved surfaces only. Riding on paved surfaces may seriously affect handling and control and can cause loss of control. Always wear a helmet, eye protection and protective clothing. Never carry any passengers. Never engage in stunt riding. Riding and alcohol/drugs don't mix. Avoid excessive speed and be particularly careful on difficult terrain. Please 'tread lightly': always ride in a responsible manner, respecting the environment as well as country and local laws. The riders in this brochure are professionals: don't attempt to emulate them. The specification and appearance of Yamaha products will be varied from time to time without notice, and as shown here are illustrative only and are not a contractual description of products. Some models are shown with optional accessories. All ATVs come with a 12-month Limited Factory Warranty, except for Banshee, which carries a 90-day Limited Factory Warranty. See your dealer for details.

The Yamaha Chain of Quality

Yamaha technicians are fully trained and equipped to offer the best service and advice for your Yamaha product. For this reason, Yamaha strongly recommends visiting an official Yamaha dealer for all your service requirements.

Yamaha Genuine Parts & Accessories are especially developed, designed and tested for our Yamaha product range. Yamaha also recommends the use of Yamalube®, our own range of high-tech lubricants – the lifeblood of Yamaha engines. They are developed to carry on working effectively, no matter where you ride.

Besides functional and style accessories, Yamaha offers a range of high quality, innovative riding gear designed to keep you comfortable and protected. An extensive range of casual wear is also available. For more information go to:
